PROFESSIONAL EXPERIENCE

2026–now	Founder & Lead Developer FREELANCE · PFA, Piatra-Neamț Registered sole trader (CAEN 6201) providing software development services to a hospitality group under contract. Sole operator: I handle the client relationship, requirements analysis and effort estimation, and deliver and maintain three production WordPress/WooCommerce sites, including online payment gateway and third-party booking integrations.	
2025–2026	IT Director LEAD · SISC, Bucharest Led a technical department of 30+ members: task distribution, timelines, technical standards and sprint planning across frontend, backend and operations. Owned the development and maintenance of the organisation's internal platforms, working mainly on the backend in Java and Node.js with Google Authentication, QR-code scanners and online payment processing. Contributed to organisational and strategic decisions.	
2026	Data Analyst Intern INTERNSHIP · BCR (Erste Group), Bucharest Professional internship of 112 hours. Built a supervised regression pipeline on 453 language models: feature selection through Spearman correlation, ANOVA and VIF, model comparison under 5-fold cross-validation, SHAP explainability.	
2023	Event Staff OPERATIONS · Cupa Kober, Piatra-Neamț Logistics and match-day coordination at an international tennis tournament; communication in English with players, staff and spectators.	

EDUCATION

2024–now	Economic Informatics B.Sc. · ASE Bucharest, CSIE	
2020–2024	Mathematics & Informatics BACCALAUREATE · National College of Informatics, Piatra-Neamț	

PROFILE

Backend-oriented Economic Informatics student who led a technical department of 30+ members as IT Director and now runs an independent development practice as a registered sole trader. Experienced in coordinating multidisciplinary teams and in delivering production systems: database design, authentication, payment integrations and Linux server administration, from scoping through deployment and maintenance.

TECHNICAL SKILLS

Languages	Java, JavaScript, SQL and PL/SQL, C/C++ (advanced); Python, C#/ .NET, Assembly (intermediate)
Databases	Oracle, MySQL, MariaDB; relational design, query writing and optimisation
Backend	Node.js with Express and Sequelize, REST APIs, authentication flows, online payment integrations
Web	React, HTML/CSS, WordPress, WooCommerce
Infrastructure	Linux servers (nginx, PM2, SSH, DigitalOcean), Git, GitLab, GitHub
Data analysis	pandas, scikit-learn, SHAP, regression modelling

SOFT SKILLS

Team leadership (departments of 30+ members) • end-to-end project ownership • client communication and requirement scoping • analytical problem solving • adaptability and work ethic.

CERTIFICATES

May 2026	Database Programming with PL/SQL, Oracle Academy
Oct. 2025	Database Design and Programming with SQL, Oracle Academy
May 2023	Certificate in Advanced English (C1), Cambridge Assessment English
May 2023	European Computer Driving Licence (ECDL)

PROJECTS

2026	LLM Price-Performance Tracker: regression study on 453 language models identifying the technical drivers of token pricing; Gradient Boosting selected by cross-validation, SHAP explainability.
2025	Tribuna Nemțenilor: local news site with Firebase authentication and Firestore-backed content management.
